Hi Laurel,

I want to tell you that I am enjoying this class for Fitting Home Sewing Patterns. I wanted to say few things about me. My name is Amita Patel. I came from India in 1982. I study Home science for four years and

1st year Master. I learn things with hand made sample . I have lots of practical knowledge, but no technical knowledge. I came USA and start working for minimum wages. Luckily I found a job in quality control department as QC inspector. I learn so much by working and watching people. I had so much interest in fabric, sewing, print and everything about apparel business. I finally found great place to work at Lansdale MFG. This job taught me all most every thing I know about garment. I worked in all department - fabric, cutting, trim, quality control and receiving. My life has moving faster since that moments. Than I worked at Hart strings LLC - Famous children's wear. I worked as a Quality control coordinator and got promoted to Technical design department as Technical designer. I was looking more challenge in life. I am working at Lilly Pulitzer as Technical design department as a Technical designer.

I meet Laurel, is a best thing happen to me. I am learning so much from this class. She have such a nice techniques and such a way to explains, That even hardest thing in a book makes easier to understand. She has so much patience in class. Above all these things she is such a nice person.

Amita Patel
Technical Designer
